#### **Kraken2\* Metagenomic Analysis**

The Kraken Metagenomics workflow assigns taxonomic labels to short DNA sequences with high sensitivity and speed using exact alignments of k-mers and a novel classification algorithm.

#### **Outputs:**

- Krona charts for interactive exploration of each sample
- classified samples
- tab-delimited kraken-report in different formats  
(see [www.starseq.com](http://www.starseq.com) for more information)
